Loading capacity (per level):	250 Kg. Total 1.250kg						
Weight (kg):	18.81						
Finishing:	Galvanized						
Packaging:	Carton box	180cm 45cm 90cm					
Pallet:	24 unit/pallet						
Article description and specifications:		Metal Steel Shelving with HDF board with Rivet technology. This assembly system allows a higher sturdiness, easier assembly and longer durability. Safety use with no sharpen edges. Easy way to join divided uprights with an innovative and patented junction plate. Heavy load capacity (250kg per level). It is the perfect metal shelving for keeping all items organised in the basement, garage, storage room, archive, warehouse, industry, or other businesses. High-density fiberboards (HDF) with a polished surface finish. The edges of the boards are protected by the beams, which provides a longer durability of the product.
