Safety Drum Vents

Drum Funnels & Equipment - Safety Drum Funnels, Vents & Faucets

Prevent dangerous drum failure while storing flammables—relieve pressure build-up due to heat.

- Vents automatically relieve pressure between 3 and 8 psi (30 to 55 kPa) and include a flame arrester
- Vacuum relief during sudden cooling or liquid drain-off
- Valve within the vent is tested to allow 1 litre of water through a 9.5-mm pipe nipple in less than 6 seconds for vacuum relief during drum dispensing operations
- Vacuum relief is automatic on vertically-installed vents and manual on horizontally-installed vents

- For protection and avoidance of high-pressure drum failure while dispelling heat using its flame arrester.
