Key Factors

1. Tolerance for dimension: The overall size of steel frame should be more and less than 0.5 cm from actual dimension.
2. No obvious scratch, rust, oxidation mark.
3. Product should be stable on the ground, no wobbling.
4. Loading test: 300kgs freely move, 400kg static load test for 15min no permanent deformation
5. Rubber mat nicely cut and affixed on the platform, no wrinkles and bubbles.
6. Rubber band should fit tight with the platform
7. Below new caster must be used, main difference is bearing.
